

## Out of State Extension

Connecticut residents with vehicles that are located out of state, at the time of their scheduled test date, and 30 days thereafter may apply for a **one**-time six (6) month time extension. For more information on the required documentation needed and where to submit requests for approval, [please click here](#).

## Reciprocity Testing

You may be eligible to receive a reciprocal test from one of the following jurisdictions. This means vehicles registered in Connecticut may be tested in one of these jurisdictions and comply with Connecticut’s testing requirements. Please note that a reciprocal test will be honored **ONCE**, unless you are a full-time student or have active military status. If your vehicle is eligible to receive a comparable emissions test in one of the following jurisdictions, you may apply for a **one**-time extension equivalent to the two (2) year compliance your vehicle would receive in Connecticut. However, some of these jurisdictions may **NOT** be able to accommodate your vehicle’s testing requirements and in some cases, emissions testing may be restricted to specific counties or regions. For further eligibility information, please be sure to check with the applicable jurisdiction before attempting an emissions test.

In general, the most common test is the [On-Board Diagnostic test](#); all the jurisdictions listed here perform this test, however, there may be restrictions on model year and the Gross Vehicle Weight Rating (GVWR). The following chart designates the required tests for your Connecticut registered vehicle based on model year, GVWR and fuel type; click on the links for more information on the specific test:
